

From the D ogram Wiki

There are many technologies in DSP, and here you can see them all in one list. Click through to a technology for more information.

Completing all technologies (exluding repeatables and those requiring items other than matricies) requires:

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
0		Dyson Sphere Program	1								
1		Electromagnetism	1001		10						
2		Basic Logistics System	1601		10	10					
2		Automatic Metallurgy	1401		10	10					
2		Electromagnetic Matrix	1002		10	10					
2		Basic Assembling Processes	1201		10	10					
2		Fluid Storage Encapsulation	1120		50						
2		High-Efficiency Plasma Control	1101		50						
2		Electromagnetic Drive	1701		50						
2		Engine[1]	1805		20						
2		Weapon System[1]	1801		20						
3		Improved Logistics System	1602		100						
3		Steel Smelting	1411		120						
3		Combustible Unit[1]	1802		120						
3		Smelting Purification	1402		100						

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
3		Thermal Power	1412		30						
3		Plasma Extract Refining	1102		100						
3		Battlefield Analysis Base[1]	1826		100						
4		Environment Modification	1415		400						
4		Crystal Smelting	1403		500	500					
4		Solar Collection	1501		200						
4		Semiconductor Material	1311		200						
4		Proliferator Mk.I	1151		200						
4		Deuterium Fractionation	1134		200	300					
4		Basic Chemical Engineering	1121		200						
4		Energy Matrix	1111		200						
4		Magnetic Levitation	1702		400	100					
4		Missile Turret[1]	1806		150						
4		Prototype[1]	1819		200						

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
5		High-Efficiency Logistics System	1603		400	100					
5		Distribution Logistics System[2]	1608		600	300					
5		Titanium Smelting	1413		200	200					
5		Energy Storage	1511		600	600					
5		Photon Frequency Conversion	1502		200	200					
5		Processor	1302		800						
5		Applied Superconductor	1131		400						
5		Polymer Chemical Engineering	1122		400	400					
5		X-ray Cracking	1103		400	400					
5		Hydrogen Fuel Rod	1112			400					
5		Super Magnetic Field Generator	1711		1000	250					
5		Signal Tower[1]	1808		400	400					

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
5		Implosion Cannon[1]	1809		300	300					
5		Precision Drone[1]	1820		400	400					
6		Planetary Logistics System	1604		800	400					
6		Geothermal Extraction	1513		800	800					
6		Solar Sail Orbit System	1503		300	300					
6		High-Speed Assembling Processes	1202		600	300					
6		High-Strength Crystal	1123		600	600					
6		Reformed Refinement[3]	1104		500	500					
6		Thruster	1113		1000						
6		Proliferator Mk.II	1152		800	600					
6		Magnetic Particle Trap	1703		1000	800					
6		Titanium Ammo Box[1]	1812		600	600					
7		Integrated Logistics System	1607		1000	500	50				

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
7		High-Strength Titanium Alloy	1414		800	800	80				
7		High-Strength Lightweight Structure	1521		1200		200				
7		Ray Receiver	1504		600	600					
7		Mini Fusion Power Generation	1416		1000	500	250				
7		High-Strength Material	1132			600	150				
7		Structure Matrix	1124		800	800					
7		Explosive Unit[1]	1803		400	200					
7		Reinforced Thruster	1114			1600					
7		High-Explosive Shell Set[1]	1814		400	400					
7		Planetary Defense System[1]	1809		600	600					
7		Superalloy Ammo Box[1]	1813		600	600	300				
7		Attack Drone[1]	1821		500	500	500				
8		Interstellar Logistics System	1605		1200	1200	120				

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
8		Interstellar Power Transmission	1512		1200	1200	120				
8		Particle Control	1133		800	800	200				
8		High-Strength Glass	1126			800	400				
8		Casimir Crystal	1125		800	800	800				
8		Miniature Particle Collider	1142		800	800	800				
8		Proliferator Mk.III	1153		800	600	400				
8		Satellite Power Distribution System	1712		800	800	800				
8		Supersonic Missile Set[1]	1815		800	800	200				
9		Gas Giants Exploitation	1606		1200	1200	1200				
9		Information Matrix	1312		800	800					
9		Wave Function Interference	1141		1200	1200		200			
9		Crystal Explosive Unit[1]	1804		800	800	800				
9		Strange Matter	1143		1000	1000	1000				
9		Crystal Shell Set[1]	1816		800	800	800	800			
9		Plasma Turret[1]	1811		1000	1000	1000	500			

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
9		Corvette[1]	1822		600	600	600	600			
10		Vertical Launching Silo	1522		1600	1600	1600	1600			
10		Digital Analog Computation[1]	1901		800						
10		Quantum Chip	1303		800	800		800			
10		Plane-Filter Smelting[4]	1417		1000	1000	1000	1000			
10		Gravitational Wave Refraction	1704		1200	1200	1200				
11		Dyson Sphere Stress System	1523		2000	2000	2000	2000	2000		
11		Planetary Ionosphere Utilization	1505		2000	2000	2000		2000		

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
11		Quantum Printing	1203		800	800	800	800			
11		Photon Spotlight Mining	1304		1000	1000	1000	1000	600		
11		Negentropy Recursion[1]	1903		1200						
11		Mesoscopic Quantum Entanglement[2]	1305		1000	1000	1000	1000			
11		Gravity Matrix	1705		1600	1600	1600				
11		Gravity Missile Set[1]	1817		1000	1000	1000	1000	1000		
11		Destroyer[1]	1823		800	800	800	800	800		
12		Dirac Inversion Mechanism	1506		3000	3000	750	750	1500		
12		Matter Recombination[1]	1902		600						

Tier	Icon	Technology	ID	Prerequisites	Resource Consumption					Unlocks	
13		Controlled Annihilation Reaction	1145			4000			2000		
14		Artificial Star	1144		1200	1200	1200	1200	1200		
14		High-Density Controlling Annihilation[1]	1904		2000						
14		Antimatter Capsule[1]	1818		3000	3000	3000	3000	3000		
15		Universe Matrix	1507		2000	2000	2000	2000	2000		
16		Mission Completed!	1508		4000

Notes

1. Added in the Patch 0.10.28.20729, December 15th, 2023
2. Added in the Patch 0.9.27.14546, September 27th 2022
3. Added in the Patch 0.9.26.12891, June 10th 2022
4. Added in the Patch 0.7.18.6914, May 28th 2021

Research: Technologies and Upgrades

Technologies

Tiers 0-1

Dyson Sphere Program · Electromagnetism

Tier 2

Basic Logistics System · Automatic Metallurgy · Electromagnetic Matrix · Basic Assembling Processes · Fluid Storage Encapsulation · High-Efficiency Plasma Control · Electromagnetic Drive · Engine · Weapon System

Tier 3

Improved Logistics System · Steel Smelting · Combustible Unit · Smelting Purification · Thermal Power ·

Plasma Extract Refining · Battlefield Analysis Base

Tier 4

Environment Modification · Crystal Smelting · Solar Collection · Semiconductor Material · Deuterium Fractionation · Proliferator Mk.I · Basic Chemical Engineering · Energy Matrix · Magnetic Levitation · Missile Turret · Prototype

Tier 5

High-Efficiency Logistics System · Titanium Smelting · Energy Storage · Photon Frequency Conversion · Geothermal Extraction · Processor · Applied Superconductor · Polymer Chemical Engineering · X-Ray Cracking · Hydrogen Fuel Rod · Super Magnetic Field Generator · Signal Tower · Implosion Cannon · Precision Drone

Tier 6

Integrated Logistics System · Distribution Logistics System · Planetary Logistics System · Solar Sail Orbit System · High-Speed Assembling Processes · High-Strength Crystal · Reformed Refinement · Thruster · Proliferator Mk.II · Magnetic Particle Trap · Titanium Ammo Box

Tier 7

High-Strength Titanium Alloy · High-Strength Lightweight Structure · Ray Receiver · Mini Fusion Power Generation · High-Strength Material · Structure Matrix · Explosive Unit · Reinforced Thruster · High-Explosive Shell Set · Planetary Defense System · Superalloy Ammo Box · Attack Drone

Tier 8

Interstellar Logistics System · Interstellar Power Transmission · Particle Control · High-Strength Glass · Casimir Crystal · Miniature Particle Collider · Proliferator Mk.III · Satellite Power Distribution System · Supersonic Missile Set

Tiers 9-10

Gas Giants Exploitation · Information Matrix · Wave Function Interference · Crystal Explosive Unit · Strange Matter · Crystal Shell Set · Plasma Turret · Corvette · Vertical Launching Silo · Quantum Chip · Plane-Filter Smelting · Gravitational Wave Refraction · *Digital Analog Computation*

Tiers 11-16

Dyson Sphere Stress System · Planetary Ionosphere Utilization · Quantum Printing · Photon Spotlight Mining · Gravity Matrix · Gravity Missile Set · Destroyer · Dirac Inversion Mechanism · Controlled Annihilation Reaction · Artificial Star · Antimatter Capsule · Universe Matrix · **Mission Completed!** · *Negentropy Recursion* · *Matter Recombination* · *High-Density Controlling Annihilation*

Upgrades

Exploration

Universe Exploration

Mecha

Mecha Core · Mechanical Frame · Inventory Capacity · Auto Reconstruction Marking · Communication Control · Mass Construction · Energy Circuit · Drone Engine · Drive Engine · Energy Shield

Building

Solar Sail Life · Solar Sail Attaching Speed · Ray Transmission Efficiency · Vertical Construction · Pile Sorter Upgrade · Distribution Range · Logistics Carrier Engine · Logistics Carrier Capacity · Logistics Station Integrated Logistics · Veins Utilization · Research Speed

Combat

Kinetic Weapon Damage · Energy Weapon Damage · Explosive Weapon Damage · Combat Drone Damage · Combat Drone Attack Speed · Combat Drone Durability · Ground Squadron Expansion · Space Fleet Expansion · Enhanced Structure · Planetary Shield
